

Contents of Volume 23

Two-phase flow phenomena with depressurization – consequences for the design and layout of safety and pressure relief valves	1
F. Mayinger (Munich, F.R.G.)	
Modelling of the local distributions of velocity components and turbulence parameters in agitated vessels – methods and results	13
B. Platzter and G. Noll (Merseburg, G.D.R.)	
Effect of various schemes in a multicomponent distillation system	33
J. J. Casares Long and A. H. Burney (Santiago de Compostela, Spain)	
Prediction of dispersed phase hold-up in pulsed perforated-plate extraction columns	41
A. Kumar and S. Hartland (Zurich, Switzerland)	
Reextraction of Penicillin G and V from the organic phase in a bench-scale Karr column after reactive extraction by LA-2.	61
Z. Likidis and K. Schügerl (Hanover, F.R.G.)	
FORTHCOMING MEETING	65
Reverse osmosis for the separation of organics from aqueous solutions	67
R. Rautenbach and I. Janisch (Aachen, F.R.G.)	
Pressure changes during diffusion with chemical reaction in a porous pellet	77
A. Burghardt and J. Aerts (Gliwice, Poland)	
Influence of pressure on the gas–liquid interfacial area and the gas-side mass transfer coefficient of a laboratory column equipped with cross-flow sieve trays.	89
A. Badssi, R. Bugarel (Toulouse, France), C. Blanc, J. L. Peytavy (Artix, France) and A. Laurent (Nancy, France)	
Mathematical programming tools for chemical engineering process design synthesis	99
P. Floquet, L. Pibouleau and S. Domenech (Toulouse, France)	
Effect of dissolved gases on subcooled flow boiling heat transfer	115
H. Müller-Steinhagen (Auckland, New Zealand), N. Epstein and A. P. Watkinson (Vancouver, B.C., Canada)	
The use of expert systems in chemical engineering	125
H.-H. Erdmann, H.-D. Engelmann, W. Burgard and K. H. Simmrock (Dortmund, F.R.G.)	
BOOK REVIEWS	135
Fluid flow inside packed beds	137
I. Ziolkowska and D. Ziolkowski (Warsaw, Poland)	
Digital simulation of an industrial ammonia reactor	165
S. S. E. H. Elnashaie (Riyadh, Saudi Arabia), A. T. Mahfouz and S. S. Elshishini (Cairo, Egypt)	
High-pressure filtration – a chance for the downstream processing of biological dispersions.	179
W. F. Hess and M. Kalwa (Hamburg, F.R.G.)	
Break-up of a drop in a stirred tank.	189
V. Hančil and V. Rod (Prague, Czechoslovakia)	
Sensitivity of countercurrent extraction column response to changes in operating parameters	195
L. Steiner and S. Hartland (Zurich, Switzerland)	
A model study of a conventional fixed bed tubular reactor with a catalyst layer on the inside tube wall.	203
As. Anastasov, D. Elenkov and V. Nikolov (Sofia, Bulgaria)	
Design of crystallizers.	213
A. Mersmann (Munich, F.R.G.)	
BOOK REVIEWS	229
FORTHCOMING MEETINGS	233
AUTHOR INDEX	235
SUBJECT INDEX	237
